For Immediate Release:

March 26, 2020

Effective Immediately:

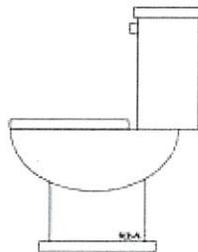

The City of Gulfport Public Works Department has been advised by our sewer division that we are experiencing difficulties with our sewer systems and lift stations due to an enormous amount of baby wipes and disinfecting wipes locking up the lift stations throughout the City.

Please dispose of these wipes in the trash. **Do not** flush them down the toilet. The City is taking all precautionary measures to not have any interruptions to your sewer service that can be prevented.

Thank you,

Wayne E. Miller, P.E.  
Director of Public Works
